

I have been an xm radio listener for over a year. This is a service that I pay for and should have the right to hear all the programs and services they offer. Agencies and associations should not be allowed to bring pressure to limit what I can hear on services I pay for. I spend hours in my car for work purposes. I drive in areas where I am not able to get classical music stations that also provide news and weather. XM radio is the only way I can get these services in many of the areas I travel in. Please reject NAB's petition 04-160
